7	Blade	1	Silver	Blade.stl

BEFORE YOU START

Sand the mating faces

Sand the mating faces (shown in yellow) on a flat surface so there are no gaps.

Blade side

Pommel side

STEP 1

Guard ring

1. Apply superglue to the guard face of the body.
2. Line the red guard ring up with the guard and press it on flat against the body.

STEP 2

Thrusters

1. Apply superglue to the peg and base of each thruster.

2. Press the thrusters into each of the angled holes at the top of the handle.

STEP 3

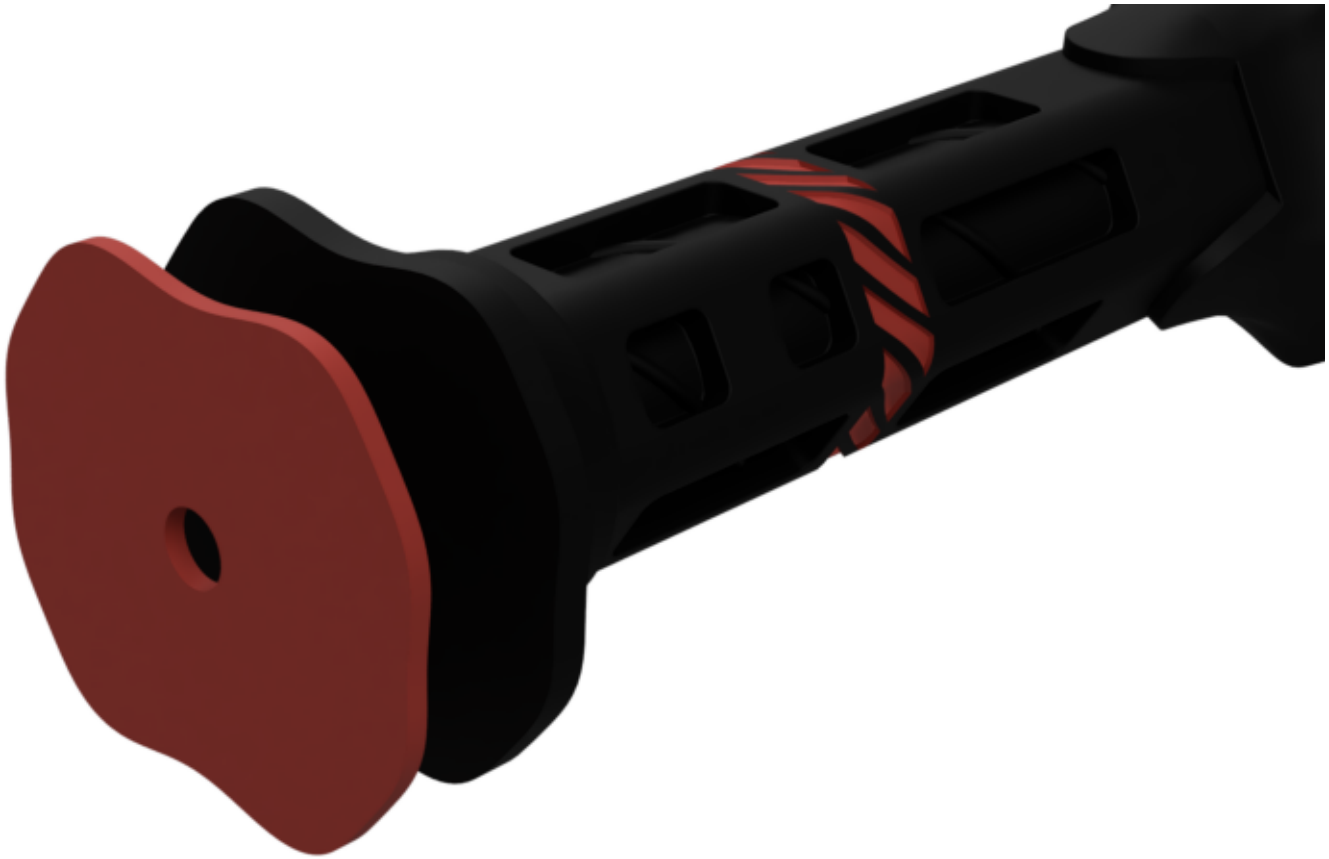

Blade

1. Put superglue on the peg and the triangle at the base of the blade.
2. Press the peg into the hole, lining the triangle up with the triangle in the guard ring.

STEP 4

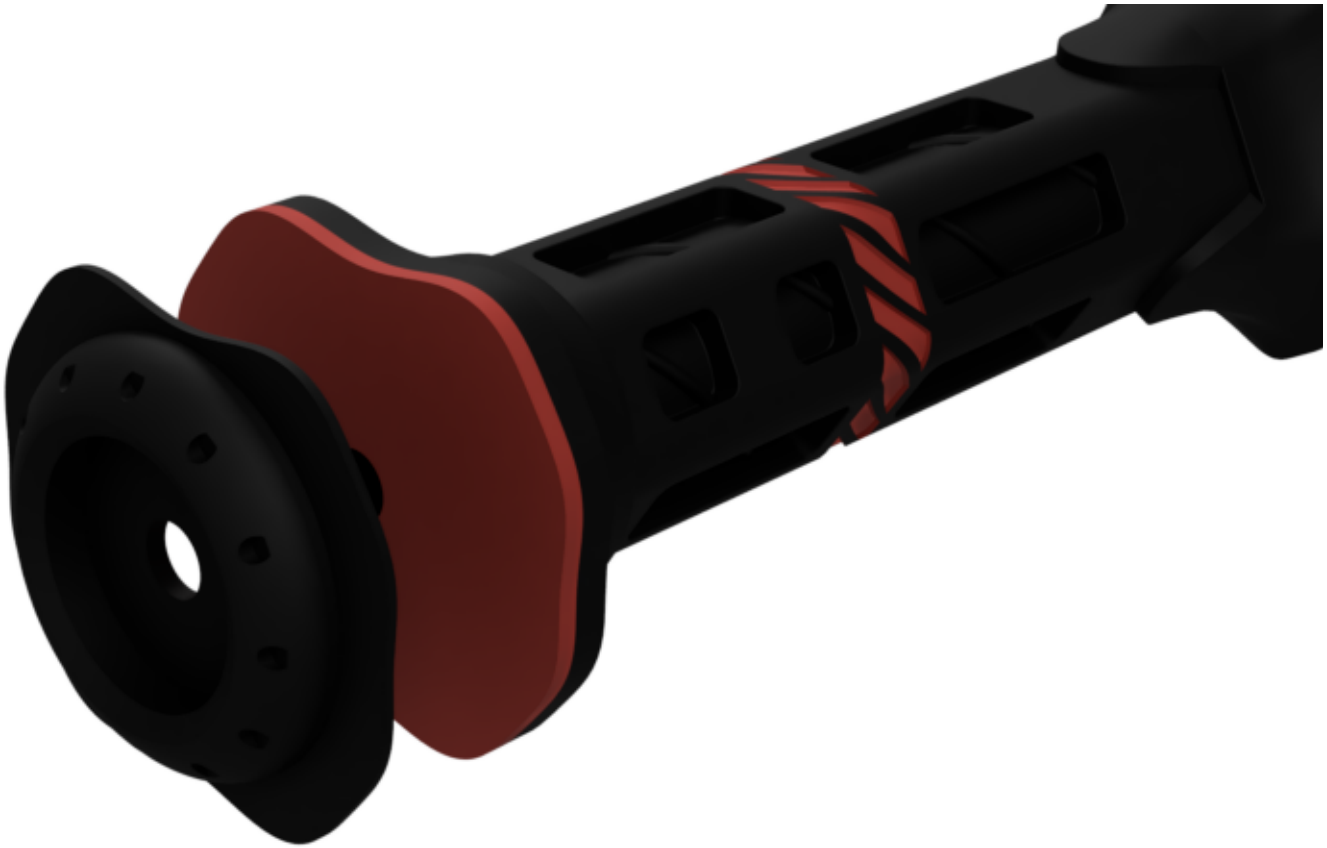

Collar ring

1. Apply superglue to the pommel end of the body.
2. Line the red collar ring up with the body and press it on flat.

STEP 5

Collar plate

1. Apply superglue to the back of the collar ring.
2. Line the black collar plate up with it and press it on flat.

STEP 6

Pommel nozzle

1. Put superglue on the nozzle peg.
2. Press the peg into the hole in the collar plate, making sure the charm loop sits where you want it.
